

*Interim Leadership for Transformation & Impact*

# Automotive

Interim Management Worldwide

# The automotive industry is reinventing itself at full speed

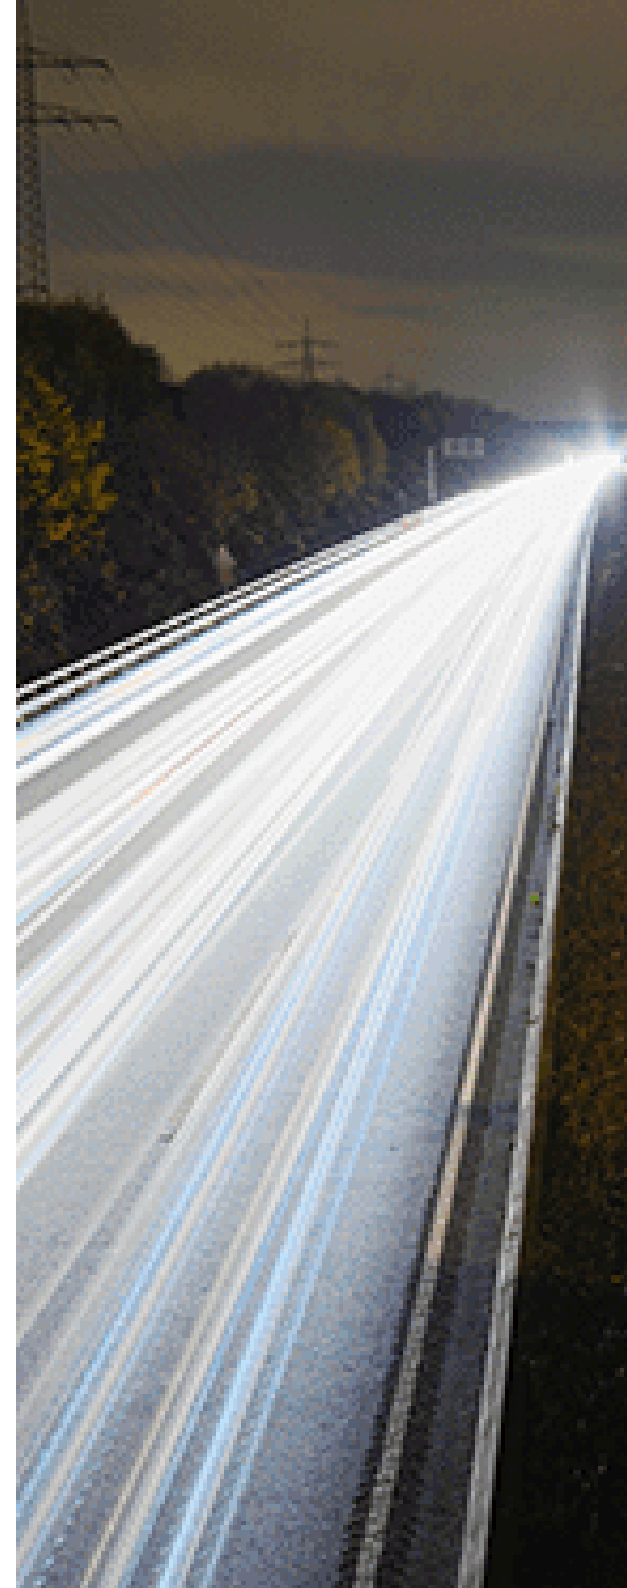

Electrification, autonomous driving, and connected mobility are disrupting traditional business models. Global supply chains remain under pressure, and digital technologies are transforming both manufacturing and customer experience.

The transition is as complex as it is urgent. Suppliers, OEMs, and mobility providers must balance innovation with profitability, adapt to regulatory change, and manage the shift toward sustainable production - all while facing ongoing talent shortages.

The challenges are accelerating:

- Managing transformation programs across global operations
- Reducing cost and complexity while maintaining quality
- Securing supply chains amid market volatility
- Integrating digital, electric, and sustainable technologies
- Attracting leadership talent with both technical and commercial vision

In this race, delay is costly; innovation waits for no one. Every decision must align engineering, people, and performance.

Interim Management Worldwide (IMW) connects automotive manufacturers, suppliers, and mobility innovators with proven interim executives who understand the dynamics of change.

Our leaders bring decades of international experience in production, R&D, supply chain, and transformation. They step in fast to stabilize performance, implement new technologies, and lead complex organizational change - ensuring results from day one.

Whether guiding electric vehicle programs, optimizing global supply networks, or driving digital transformation, IMW interim executives deliver impact through speed, clarity, and leadership.

*Driving performance,  
electrification, and mobility  
of the future*

### **Automotive – Key Segments**

- Passenger Vehicles
- Commercial & Heavy-Duty Vehicles
- Automotive Suppliers (Tier 1 & 2)
- New Mobility & Smart Transportation
- Battery & Energy Systems
- Aftermarket & Service Networks
- Motorsport & Performance Engineering
- Sustainability & Circular Mobility
- Software & Digital Vehicle Ecosystems
- Global Supply Chain & Logistics

### **Common Interim Roles**

- Chief Operating Officer (COO)
- Plant / Operations Director
- Head of Supply Chain & Logistics
- Engineering Program Director
- Transformation / Change Manager
- Quality & Compliance Lead
- Chief Technology Officer (CTO) – Mobility
- Interim CEO – Automotive Division
- Product Development Director
- Electrification Program Manager

*When transformation can't wait,  
IMW delivers*

Why clients choose IMW:

- Proven track record in energy transition and sustainable transformation
- Immediate access to leaders in renewables, utilities, and ESG
- Global coordination, local execution
- Speed, accountability, measurable results

With over 30 trusted partners and 65 offices worldwide, IMW combines global reach with local understanding; ensuring the right match between challenge, leadership, and cultural fit.

Discover how IMW interim leaders help automotive organizations accelerate transformation, optimize performance, and shape the future of mobility.
